

REPORT ON THE PUBLIC HEARING
OF THE
ENVIRONMENTAL IMPACT ASSESSMENT
CARIBBEAN CEMENT COMPANY LTD.
EXPANSION & MODERNISATION PROGRAMME
HELD ON
NOVEMBER 3, 2005
AT THE
JAMAICA CONFERENCE CENTRE,
KINGSTON

CARIBBEAN CEMENT COMPANY LIMITED
Rockfort
St. Andrew
Jamaica

Prepared by:
ENVIRONMENTAL SOLUTIONS LTD.
20 West Kings House Road
Kingston 10
Jamaica

December 2005

1.0 Purpose

This document incorporates a report on the public consultation requested for the Caribbean Cement Company Expansion and Modernization Programme held at the Jamaica Conference Centre on November 3, 2005.

2.0 Background

The CCCL is carrying out a modernization and expansion programme of the plant at Rockfort. The programme is phased over a five-year period, with the largest component being the clinker expansion project. This project will involve the installation of a new clinker production line to be constructed over three years. Upon completion, the new “dry” clinker production line will replace the existing wet clinker line. The proposed expansion will take place within the footprint of the existing plant.

An Environmental Impact Assessment for the Caribbean Cement Company Expansion and Modernization Programme was requested by NEPA and this was conducted by Environmental Solutions Ltd. and submitted to NEPA in August 2005.

3. Information Dissemination

Information on the Public Hearing was disseminated by way of printed media, telephone calls, and a Town Crier. (Appendix I)

4. The Public Hearing

4.1 Date, Venue and Programme

The Public Consultation was held on Thursday, November 3, 2005 at 5.00 p.m. at the Jamaica Conference Centre, Kingston. The session was Chaired by Mr. Morin Seymour, Managing Director of the Kingston Restoration Company. The agenda for the meeting is given in Appendix II.

The meeting was fairly well attended with at least 76 persons signing the register. Copy of the registration sheets is given in Appendix III.

Presentations were given by Mr. Ken Wiltshire, Project Manager Kiln Number 5 Project, Caribbean Cement Company Ltd., (Appendix IV) Mrs. Eleanor Jones, Managing Director and Consulting Principal, Environmental Solutions Ltd. And Mr. Stephen Haughton, Technical Specialist Air Dispersion Modeling and Environmental Solutions Consultant. (Appendix V).

4.2 Questions and Answer Session

The main issues raised in the question and answer session are listed below, details of which are presented in the verbatim report attached. (Appendix VI).

1. Dust pollution, monitoring dust emissions
2. Noise pollution
3. Environmental effects on Harbour View and environs
4. Possibility of using material from desilting of harbour in the cement process and
5. Plant standards – will it meet international standards
6. Community involvement, training and employment
7. Where Jamaican plant will rank in Caribbean and Latin America region – how will it compare in terms of production and efficiency.
8. Amortization period of new plant
9. Carbon credits
10. Crime
